Thank you for choosing FORA IR20 ear thermometer. This innovative medical device relies on advanced infrared (IR) technology to measure temperature instantly.

### INTENDED USE

FORA IR20 ear thermometer is intended for professional use. It is intended for use by people of all ages for home and professional use.

### HOW IT WORKS

The thermometer measures the infrared heat generated by the eardrum and its surrounding tissue. The thermometer then converts it into a temperature value shown on the LCD screen.

### MEASUREMENT TEMP

- Operate the thermometer in temperatures between 60.8°F to 104°F (16°C to 40°C) and relative humidity less than 95%.
- Avoid direct sunlight.
- Use only FORA IR20 probe covers for the infrared ear thermometer.
- Avoid dropping the thermometer.

### IMPORTANT SAFETY INSTRUCTIONS

**READ THIS BEFORE USE, KEEP THESE INSTRUCTIONS IN A SAFE PLACE.**

The following basic safety precautions should always be taken:

1. **Close supervision is necessary when the thermometer is used by, on, or near children, handicapped persons or invalids.**
2. **Use the thermometer only for the intended use described in this manual.**
3. **Do not use the thermometer if it is not working properly, or if it has suffered any damage.**
4. **Do not use accessories which are not supplied or recommended by the manufacturer.**
5. **Proper maintenance is essential to the longevity of your device. If you are concerned about your accuracy of measurement, please contact the local customer service or place of purchase for help.**

### CAUTIONS AND WARNINGS

- As with any thermometer, proper technique is crucial to getting accurate temperature readings. Please read this manual thoroughly and carefully before use.

### RESTRICTIONS OF USE

This thermometer is clinically proven to produce accurate temperature measurements. However, please be advised if you have the following situations:

1. **The accuracy cannot be ensured for a person who has a deformity in their ear, which prevents the thermometer probe from properly being inserted into the ear canal.**
2. **The accuracy cannot be ensured when blood or drainage is found in the ear canal.**
3. **If ear drops or medications have been placed in one ear, take measurements from the other ear.**

**NOTE:** If a probe cover is not attached on the probe, LCD will show “     ” until a new probe cover is firmly attached to the probe.

**NOTE:** If an ear plug or hearing aid is used, remove the device and wait for 15 minutes before taking temperature.

### HOW DOES IT WORK

1. **Temperature Scanning In Progress**
2. **Temperature Reading**
3. **Memory Mode**
4. **Record Numbers**
5. **Low Battery Indicator**
6. **Temperature Unit**
7. **Communication Symbol (for FORA IR20b)**
8. **No Probe Cover Detected**
9. **Ear Temperature Indicator**

### LCD SCREEN

**Scan Button**

**Probe Lens**

**Probe**

**Probe Cover Detector**

**Probe Cover Ejection Button**

**On/Memory Button**

**Manufacturing Label**

**Battery Cover**

**Hook** (for FORA IR20b)

**Probe Cover**

**Bluetooth Indicator** (for FORA IR20b)

### MEASURING TEMPERATURE

1. Press and release the On/Memory button to turn on the thermometer. When ready, the thermometer displays the last measurement.
2. Gently fit the probe with a clean probe cover into the ear canal.
3. Press and release the Scan button. You will hear a beep to indicate the measurement is complete and the thermometer can be removed.
4. Read the result. “     ” is shown together with a temperature value (“       ” for IR20b only). Press the ejection button to discard the used probe cover into a trash can.

**NOTE:** Turn off the thermometer by pressing On/Memory button twice. It will automatically turn off if left idle for 3 minutes.

### RESULT INDICATORS

- **Temperature ≤ 89.5°F (31.9°C)**: “Lo” with red backlight
- **89.6°F (32.2°C) ≤ Temperature < 100.3°F (37.9°C)**: Result with green backlight
- **100.4°F (38°C) ≤ Temperature < 100.9°F (38.3°C)**: Result with red backlight
- **Temperature ≥ 100.9°F (38.3°C)**: “Hi” with red backlight

### HINTS ON TAKING TEMPERATURES

1. As with other thermometers, you may observe slight variations in consecutive measurements. It is recommended that you take 3 temperature readings and use the highest one for the following situations:
   - Infants younger than 3 months old.
   - Children younger than 3 years old and who have a compromised immune system and the presence / absence of fever is critical.
   - When you are learning to use the thermometer.
2. Do not take a reading while the patient is moving and/or talking. Wait for 30 minutes after any of the following situations before taking a measurement:
   - When the ear has been covered.
   - After exercising, swimming, or taking a bath.
   - When the patient has been exposed to extreme temperature.
3. To take accurate readings, the ear must be free from excessive earwax build-up.

### RECALLING THE MEMORY

Your thermometer stores last 10 readings in the memory.

1. **Be sure the thermometer is OFF before recalling the memory.**
2. **Press the On/Memory button to turn on the thermometer.**
3. Press the On/Memory button for 3 seconds to enter memory mode. Each time you press the
On/Memory button, a result will be displayed in the order of dates (latest result shown first), together
with “Err” and number (from 1 to 5). When the memory is full, the oldest result is deleted as the new
one is added. When the last result is displayed in the LCD, press On/Memory button again to return to
the first one.
4. Exit the memory. Press On/Memory button again, and then the LCD will show “OFF” to exit memory.

VIEWING RESULTS ON A MOBILE DEVICE (FOR FORA IR20b)
You can transmit your data from the meter to your devices (e.g. smartphone, tablet, PC...) via Bluetooth.
Please contact your local customer service or place of purchase for assistance.

Pairing with your mobile device
1. On your mobile device, turn on the Bluetooth function and follow the pairing instructions inside of the
APP (e.g. scan for the meter to add it into APP).
2. After each measurement, the Bluetooth will be turned on automatically to transmit data to APP.

Bluetooth indicator on the meter

<table>
<thead>
<tr>
<th>Bluetooth Indicator</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Flashing Blue</td>
<td>The Bluetooth function is enabled and waiting for connection.</td>
</tr>
<tr>
<td>Solid Blue</td>
<td>The Bluetooth connection is established.</td>
</tr>
</tbody>
</table>

WARNING:
● While the meter is in transmission mode, it will be unable to perform a test.
● Make sure your device with iOS (6 or above) or Android System (4.3 or above) has turned on
Bluetooth transmitting the data and the meter is within the receiving range.

REPLACING THE BATTERY
The thermometer comes with two 1.5V AAA alkaline batteries. Replace them when “Err” appears. Please
follow the steps for battery replacement.
1. Remove the battery cover.
2. Place the new batteries in the battery compartment and press it in until the batteries are secured.
3. Reattach the battery cover.

NOTE:
● Although the thermometer works when “Err” appears, we still recommend that you change the
batteries to obtain an accurate result.
● Remove the batteries if stored for a long period of time.
● The batteries should be kept out of children. If they are swallowed, promptly see a doctor for help.
● Properly dispose of the batteries.

ABOUT NORMAL BODY TEMPERATURE & FEVER
Body temperature can vary from person to person. It also varies on different part of the body and time
of day. The following table shows the statistics of normal ranges from different body parts. Please keep
in mind that temperatures measured from different parts, even at the same time, should not be directly
compared.

Fever indicates that the body temperature is higher than normal. This symptom may be caused by
infection, overdressing or immunization. Some people may not experience fever even when they are ill.
These include, but are not limited to, infants younger than 3 months old, persons with compromised
immune systems, persons taking antibiotics, steroids or antipyretics (aspirin, ibuprofen, acetaminophen),
or persons with certain chronic illnesses. Please consult your physician when you

TROUBLESHOOTING
All error messages below would be shown together with red backlight. Please follow “what to do” to
resolve problems. If the problem still exists, please call your local dealer for help.

<table>
<thead>

<th>What To Do</th>
</tr>
</thead>
<tbody>
<tr>
<td>Err1</td>
<td>Appears when environmental temperature is below or above system operation range.</td>
<td>Put the thermometer under operating temperature range of 60.8°F to 104°F (16.0°C to 40.0°C).</td>
</tr>
<tr>
<td>Err2</td>
<td>No probe cover detected.</td>
<td>Ensure the probe cover is fitted on firmly, or replace it with a new one.</td>
</tr>
</tbody>
</table>
| Err3    | Thermometer errors. | Review the instructions and re-start the measurement procedure. If the problem persists, please contact your
dealer. |
| Err4    | Appears when the batteries can’t provide enough power for a test. | Replace the old batteries with new ones immediately. |

SPECIFICATIONS

Dimensions: 165 mm x 32.4 mm x 38.7 mm
Weight: 85.5 g
Battery: 2 x 1.5V AAA alkaline batteries
External Output: Bluetooth (For FORA IR20b)
Displayed Temperature Range: 89.8°F to 109.4°F (32°C to 43°C)
Display Resolution: 0.1°F / 0.1°C
Accuracy: Meet the accuracy requirement specified in ASTM E1965-98
±0.4°F (±0.2°C) for the range of 96.8°F to 102.2°F (36.0°C to 39.0°C)
±0.5°F (±0.3°C) from 89.6°F to 96.6°F (32.0°C to 35.9°C) and from 102.4°F to 109.4°F (39.1°C to 43.0°C)

Temperature Unit: °F
Operating Temperature Range: 60.8°F to 104°F (16°C to 40°C)
Operating Humidity: 50% RH or less
Storage Temperature Range: -4°F to 140°F (-20°C to 60°C)
Storage Humidity: 95% RH or less
Memory Capacity: 10 measurements
The specifications may be changed without prior notice.

REFERENCE STANDARDS

Device Standard: Device Corresponds to the requirements of the standard for infrared thermometers.
EN 60601-1:2010.
Electromagnetic Compatibility: Device fulfills the stipulations of the standard EN 60601-1-2.
The stipulations of EU-Directive 93/42/EEC for Medical Devices Class IIa have been fulfilled.

FEDERAL COMMUNICATIONS COMMISSION (FCC) STATEMENT

You are cautioned that changes or modifications not expressly approved by the part responsible for compliance
could void the user’s authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15
of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential
installation. This equipment generates, uses, and can radiate radio frequency energy, and, if not installed and used in
ac—cordance with the instructions, may cause harmful interference to radio communications. However, there is no
guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference
to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to
try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference and
2. This device must accept any interference received, including interference which may cause undesired operation of
the device.

FCC RF Radiation Exposure Statement:
1. This transmitter must not be co-located or operating in conjunction with any other antennas or transmitter.
2. This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This
equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator radiation
source and your body.

Care and Cleaning

● The probe is not waterproof. Please wipe it with a clean and dry cotton swab.
● The body of the thermometer is not water-resistant. Never put the thermometer under a running tap
or submerge it into water. Use a soft and dry cloth to clean it. Do not use abrasive cleaners.
● Store the thermometer in a cool and dry location. Free from dust and away from direct sunlight.
